

Blooming beauties for a sunburnt country™
COLOURFUL • SCULPTURAL • SUSTAINABLE

PLANT VARIETY INFORMATION SHEET FOR:
Aloe 'Fairy Pink'

ORIGIN: South Africa

GENUS: Aloe

COMMON NAME OF SPECIES: Aloe Hybrid

PROTECTION STATUS: Being test marketed under section 43(6) of the Plant Breeders Rights Act, 1994 until 18 March 2009, after which full protection under the Plant Breeders Rights Act is intended. A condition of sale is that no commercial propagation or export of the plants takes place without permission and that every plant subsequently supplied by the purchaser to another party is done on the strict condition that the official  label is attached to that plant.

CHARACTERISTICS: Tiny stem less hybrid aloe with soft serrated leaf edges

GROWTH HABIT: Stem less plant with clumping habit

FOLIAGE: Delicate fleshy pale green leaves with soft serrated leaf edges

FOLIAGE HEIGHT: Approximately 20cm

PLANT WIDTH: Approximately 12cm

FLOWERS: Numerous dainty white ballerina flowers on branched inflorescences

FLOWER COLOUR: White, sometimes with a faint pinkish tinge at the base of the flowers

FLOWER STEM HEIGHT: Approximately 20 cm above foliage

FLOWERING PERIOD: Late summer/early autumn

HARDINESS: Hardy

WATER: Minimal water required but able to cope with significant rain once established. For pot specimens allow soil surface to dry out between watering. Require less water in winter. If desired, water during dry periods to promote foliage growth.

FROST TOLERANCE: Protect from direct frost

POSITION: Best grown in full sun or filtered sun (for optimal flowering performance and growth) but will tolerate part shade

SOIL: Grows best in rich, fertile and well drained soil. It is essential that the soil is free draining and not waterlogged

FERTILISER: Fertilise in spring for optimum growth (organic fertiliser preferred but not essential)

PEST OR DISEASES: None observed or known.

LANDSCAPE USE: Best grown as a pot specimen but also suitable for mass plantings or borders

AVAILABILITY: Currently available in limited quantities in 140mm and 180 mm pots
